

EDUCATION

Washington University in St. Louis

Doctor of Philosophy in Computer Science

St. Louis, MO, U.S.

2022 - 2025

University of Kentucky

Master of Science in Electrical Engineering (GPA: 4.0/4.0)

Lexington, KY, U.S.

2018 - 2020

Nitte Meenakhshi Institute of Technology

Bachelors in Electronics and Communication Engineering (GPA: 9.54/10 - Gold Medalist)

Bengaluru, India

2012 - 2016

WORKING EXPERIENCE

Multimodal Vision Research Lab

Postdoctoral Research Associate

Washington University in St. Louis

August 2025 - Present

- Develop deep learning models for agricultural field delineation.
- Design generative and representation learning frameworks for Geospatial AI tasks.
- Mentor PhD and master's students on multimodal learning projects.

Multimodal Vision Research Lab

Graduate Research Assistant

Washington University in St. Louis

August 2022 - August 2025

- Developed multi-modal deep learning frameworks for geospatial understanding of global soundscapes.
 - **Sat2Sound** (Under Review 2025): Developed a state-of-the-art soundscape mapping framework that leverages a Vision-Language Model (VLM) to enrich the semantic understanding of a location's soundscape, learns a shared codebook for fine-grained alignment, and enables retrieval-based, location-conditioned soundscape generation.
 - **PSM** (ACM Multimedia 2024): Extended GeoCLAP with a probabilistic, multi-scale, and metadata-aware embedding space for improved zero-shot soundscape mapping.
 - **GeoCLAP** (BMVC 2023): Proposed a tri-modal embedding space integrating satellite imagery, audio, and textual descriptions for zero-shot soundscape mapping at a global scale.
- Built large-scale ML-ready datasets:
 - **GeoSound**: A multi-resolution dataset combining satellite imagery, geotagged sounds, and textual sound descriptions.
 - **EarthCaps**: A global dataset comprising ~2.5 million satellite images and ~10 million auditory and visual captions, covering the entire Earth, generated using a state-of-the-art multimodal LLM.
- Contributed to **RANGE** (CVPR 2025), a novel retrieval-augmented method for multi-resolution geolocation embeddings.
- Contributed to additional multimodal embedding spaces:
 - **Sat2Cap** (EarthVision 2024) and **GeoBind** (IGARSS 2024) for query-driven mapping.
 - **TaxaBind** (WACV 2025) for ecological applications.
- Contributed to frameworks for ecological modeling and visual classification:
 - **LD-SDM** and **BirdSAT** (WACV 2024) for species distribution modeling and fine-grained classification.
- Contributed to diffusion model-based conditional generation methods:
 - **GeoSynth** (EarthVision 2024): A framework for controlled satellite image synthesis.
 - **MVPS** (Accepted to TMLR 2025): A framework for novel panoramic view synthesis using satellite imagery.
- Collaborated on the IARPA-funded **SMART** project:
 - Developed large-scale self-supervised learning (SSL) methods, including Masked Autoencoders (MAE), for remote sensing applications such as semantic change detection.

Valuation and Market Dynamics

Applied Scientist - Intern

Zillow Group

May 2024 - August 2024

- Explored directions for improving Zillow's flagship product, Zestimate, by incorporating a diverse set of features.
- Developed a multimodal model for sales price estimation, learning from both structured tabular data and floorplan images.
- The proposed multimodal model achieved approximately 3% improvement across all metrics compared to the baseline.

Lin Brain Lab

Graduate Research Assistant

University of Kentucky

August 2020 - August 2022

- Provided applied Machine Learning (ML) and data science support to advance Alzheimer's disease (AD) research while working on different modalities such as medical imaging, electronic health records, and genomics.
- Designed CNN and Vision Transformers (ViT) based models trained on MRI/PET imagery for AD prediction.
- Focusing on interpretability, designed CAT-XPLAIN, an inherently interpretable ViT model that uses causality in predictions to identify the most important image patches.
- Built ML models trained on genetics, electronic health records, and imaging features for biomarker discovery and early prediction of Alzheimer's disease.

Speech and Signal Processing Lab

Graduate Research Assistant

University of Kentucky

August 2018 - August 2020

- Performed analysis of articulatory differences in the speech of native and non-native speakers of English.
- Built an Automatic Speech Recognition (ASR) based Mispronunciation Detection and Diagnosis (MDD) framework. ASR was trained using Recurrent Neural Networks (RNNs) on both articulatory and acoustic features.

Kantipur Engineering College

Lecturer

Lalitpur, Nepal

April 2017 - July 2018

- Taught courses: Microprocessor, Instrumentation
- Designed and conducted a lab on Digital Signal Processing (DSP), Microprocessor.

KEY SKILLS

- **Languages and Tools:** Python (fluent), Pytorch (fluent), Git (fluent), Docker (familiar), QGIS (familiar).
- **Research Interests and Relevant Courses:** Computer Vision, Multimodal Machine Learning, Deep Learning, Self-Supervised Learning, Generative AI, Geospatial AI, Data Science, Data Structures and Algorithms.

AWARDS AND ACHIEVEMENTS

- COMPEX Scholarship offered by the Indian Embassy in Nepal for undergraduate study in India, 2012–2016.
- ECE Gold Medal, 2016 for graduating with Rank 1 in the department.

PUBLICATIONS

Preprints:

- **Khanal Subash**, Sastry Srikumar, Dhakal Aayush, Ahmad Adeel, and Jacobs Nathan, "Sat2Sound: A Unified Framework for Zero-Shot Soundscape Mapping," arXiv:2505.13777, 2025.
