EDUCATION

Washington University in St. Louis   **St. Louis, MO, U.S.**
Doctor of Philosophy in Computer Science   *2022 - May 2025*

University of Kentucky   **Lexington, KY, U.S.**
Master of Science in Electrical Engineering (GPA: 4.0/4.0)   *2018 - 2020*

Nitte Meenakhshi Institute of Technology   **Bengaluru, India**
Bachelors in Electronics and Communication Engineering (GPA: 9.54/10 - Gold Medalist)   *2012 - 2016*

WORKING EXPERIENCE

Multimodal Vision Research Lab   **Washington University in St. Louis**
Graduate Research Assistant   *August 2022 - Present*

○ Developed multi-modal deep learning frameworks for geospatial understanding of global soundscapes.
  - **GeoCLAP** (BMVC 2023): Proposed a tri-modal embedding space integrating satellite imagery, audio, and textual descriptions for zero-shot soundscape mapping at a global scale.
  - **PSM** (ACM Multimedia 2024): Extended GeoCLAP with a probabilistic, multi-scale, and metadata-aware embedding space for improved zero-shot soundscape mapping.
  - **Sat2Sound** (Under Review 2025): Utilized a Vision-Language Model and a shared soundscape concept codebook to enhance multimodal soundscape mapping, introducing location-based soundscape synthesis.
○ Built large-scale ML-ready datasets:
  - **GeoSound**: A multi-resolution dataset combining satellite imagery, geotagged sounds, and textual sound descriptions.
  - **EarthSoundCaps**: A global dataset comprising ∼2.5 million satellite images and ∼10 million auditory and visual captions, generated using a state-of-the-art multimodal LLM, covering the entire Earth.
○ Contributed to **RANGE** (CVPR 2025), a novel retrieval-augmented method for multi-resolution geolocation embeddings.
○ Contributed to additional multimodal embedding spaces:
  - **Sat2Cap** (EarthVision 2024) and **GeoBind** (IGARSS 2024) for query-driven mapping.
  - **TaxaBind** (WACV 2025) for ecological applications.
○ Contributed to frameworks for ecological modeling and visual classification:
  - **LD-SDM** and **BirdSAT** (WACV 2024) for species distribution modeling and fine-grained classification.
○ Contributed to diffusion model based conditional generation methods:
  - **GeoSynth** (EarthVision 2024): A framework for controlled satellite image synthesis.
  - **MVPS** (arxiv 2025): A framework for novel panoramic view synthesis using satellite imagery.
○ Collaborated on the IARPA-funded **SMART** project:
  - Developed large-scale self-supervised learning (SSL) methods, including Masked Autoencoders (MAE), for remote sensing applications such as semantic change detection.

Valuation and Market Dynamics   **Zillow Group**
Applied Scientist - Intern   *May 2024 - August 2024*

○ Explored directions for improving Zillow's flagship product, Zestimate, by incorporating a diverse set of features.
○ Developed a multimodal model for sales price estimation, learning from both structured tabular data and floorplan images.
○ The proposed multimodal model achieved approximately 3% improvement across all metrics compared to the baseline.

Lin Brain Lab   **University of Kentucky**
Graduate Research Assistant   *August 2020 - August 2022*

○ Provided applied Machine Learning (ML) and data science support to advance Alzheimer's disease (AD) research while working on different modalities such as medical imaging, electronic health records, and genomics.
○ Designed CNN and Vision Transformers (ViT) based models trained on MRI/PET imagery for AD prediction.
○ Focusing on interpretability, designed CAT-XPLAIN, an inherently interpretable ViT model that uses causality in predictions to identify the most important image patches.
○ Built ML models trained on genetics, electronic health records and imaging features for biomarkers discovery and early prediction of Alzheimer's disease.

Speech and Signal Processing Lab   **University of Kentucky**
Graduate Research Assistant   *August 2018 - August 2020*

○ Performed analysis of articulatory differences in speech of native and non-native speakers of English.
○ Built Automatic Speech Recognition (ASR) based Mispronunciation Detection and Diagnosis (MDD) framework. ASR was trained using Recurrent Neural Networks (RNN) on articulatory as well as acoustic features.

Kantipur Engineering College | **Lalitpur, Nepal**
Lecturer | *April 2017 - July 2018*
- Taught courses: Microprocessor, Instrumentation
- Designed and conducted lab on Digital Signal Processing (DSP), Microprocessor.

KEY SKILLS

- **Languages and Tools:** Python (fluent), Pytorch (fluent), Git (fluent), Docker (familiar), QGIS (familiar).
- **Research Interests and Relevant Courses:** Computer Vision, Multimodal Machine Learning, Deep Learning, Self-Supervised Learning, Generative AI, Geospatial AI, Data Science, Data Structures and Algorithms.

AWARDS AND ACHIEVEMENTS

- COMPEX Scholarship offered by the Indian Embassy in Nepal for undergraduate study in India, 2012–2016.
- ECE Gold Medal, 2016 for graduating with Rank 1 in the department.
